

Imerys Performance Minerals announces price increases effective May 1st, 2021

At Imerys, we constantly strive to fulfill our commitment to our customers in terms of safety, quality and security of supply.

For more than a year now, we have all faced extraordinary events that have created unique challenges across the manufacturing landscape.

Over the last several months a host of market conditions have unexpectedly worsened, resulting in unprecedented cost pressures in manufacturing supply, labor, packaging and logistics.

Under these exceptional circumstances and in order to continue to meet its customers' service expectations, Imerys Performance Minerals will be implementing surcharges and increases ranging from 3% to 10%, effective beginning May 1st, 2021. Actual charges will vary depending upon the market drivers impacting specific products and geographies, as well as contractual agreements.

Please be assured that providing you with the best possible service and quality remains our priority.

Your local Imerys Sales Manager is available should you require further information and support.

Best regards,

Imerys Performance Minerals Management Team
